

Improving Communication Confidence and Competence

Communication Skills Group

After traumatic brain injury, many important communication and social skills can be altered, which can impact life at home, work, and in the community. This group will provide education and training to improve communication confidence and competence in a fun setting.

This group will be run by two Speech-Language Therapists. Research has shown that this type of social communication skills training can improve communication skills, which can help in all areas of life.

When

This group will run on
22, 29 Nov - 6, 13 Dec - 10, 17 Jan
Fridays 10am - 12 noon
6 weeks
